The goal of these posts is to provide a short list of strong sci-fi novels and movies for a wide variety of tastes. So we can easily explore the universe of sci-fi science fiction series or the sci-fi science fiction movie genre. The list includes science fiction stories with space, time, dimension and extraterrestrial concepts that I could find. I invite you to share with me your favorites and maybe make the list a continuous work? Thanks to Google, YouTube, the internet and the World Wide Web, it is now possible to learn a lot of fascinating news and facts and I do it often. The purpose of this blog is to provide new relevant learning resources for free. Enjoy! The Digital Learning Center in the MOOC platform The Digital Learning Center (DLC) is the individual learning, studying and uniting platform for MOOCs. Millions of students around the world use it as the learning tool in a wide range of courses. MOOCs are now a reality. They are the future of education. Visit this blog to find the information you are looking for in one of the courses. Mobility Science: Transport from Space Transport. 'An integrated package that describes all routes, modes, and general characteristics of the transport of people, goods, and services worldwide.' But what is the scientific side of mobility? I explore this question by investigating the evolution of society and its impact on our own mobility. I believe that only through understanding these aspects, we can overcome the conflicts in society, be it tribal, ethnic, religious, political, and economic. When you find time spare, I recommend exploring this area of science and personally recommend the books: Expert sources: The movements of man since the first Sumerians and the origin of writing, by S. M. Oates, Worth a read: The origins of money, by M.

----- InftyEditor is a reliable tool that allows you to quickly type complex scientific formulas, using a suitable environment. The program integrates LaTeX capabilities, in order to help you quickly define mathematical algorithms, such as sums, integrals, fractions or limits, with several superscript or subscript symbols. Mathematics and chemistry editor InftyEditor offers a comprehensive text editor with LaTeX functions, which allows you to instantly define symbols, such

as square roots, Greek letters, fractions. You may easily switch from the plain text mode, indicated by the "T" button, to Math mode ("M" button), in order to activate the specific syntax support. The Math mode contains character sets, symbols and formulas. Each line end is marked with a specific symbol and the LaTeX Source bar indicates the code for each graphic representation in the editor. Defining a particular function can easily be set, by typing a backslash on your keyboard, in order to prompt the LaTeX command menu. All the supported functions and special syntax are listed in the drop down menu. Use the arrow keys in order to customize the functions For complex symbols, such as integrals, sums or multi-level square root, you need to enter various additional characters, such as superscripts or subscripts. You may easily navigate and fill in the required symbols using the arrow keys. Detailed instructions on how to define required elements are contained in the Help window. Alternatively, you can select the desired character from the context menu. Right-click on the surface of the editor grants you access to the list of characters and formulas. Up to five recently used characters are separately displayed, for cases when the same symbol is repeatedly added. Chemistry mode and additional functions InftyEditor allows you to also switch to Chemistry mode, using the "C" button in the tool bar. The function enables specific syntax for chemical elements formulas. Moreover, the program allows you to embed pictures, insert tables or handwriting. The text can be exported as a LaTeX file, MathML, HTML, Human readable TeX or Word 2007 document. With InftyEditor you can easily type any mathematical symbols, that can be found in many books, magazines, newspapers, etc. The tool automatically types the formulas without requiring you to press any special key. The software offers a lot of additional features, such as expressing the math symbols in both English and Russian characters, choosing a desired background color, font type
